The Nursing and Allied Health (NAH) Research Grant Competition provides an important opportunity to support patients' cancer care trajectory through the provision of funding for practice-based research. Practice-based research is where front-line providers, patient and family partners and other collaborators meaningfully engage to tackle complex, real-world challenges that directly affect patient care and experience. Funding will support projects to address questions raised by BC Cancer advanced practice and front-line nurses and allied health providers at the point-of-care. This research competition is possible through generous support from the BC Cancer Foundation.
